## Tool production

We are producing the new plastic injection moulding tools with the involvement of our partners. The simple tools are produced in Hungary; the more complicated ones are produced in China. The final injection moulding tools are meeting the European standards in all aspects. We ensure control and supervision during the whole process.

## Plastic injection moulding

Our machine park consists of 6- 8 pcs. CNC controlled, 35- 250 ton clamping force injection moulding machines.

Our machine park is flexibly changed and upgraded dependent on the variety of orders.

Every machine has core puller and quality verification program.

Besides the production of our own product we undertake to execute lease-work as well.

For quality production, several material dryer, material mixer, layer, toner, warm channel controller, annealer, grinder is at our service. Where possible, we immediately recycle the waste.

## Trade of used tools and machines

We believe that it is essential to adapt to the customer requirements with production equipments. There is the need of other machines, tools, devices on a regular basis, which means, that the old machines become unnecessary.

This is why we often buy and sell

- machine tools: turning machine, power saw, drill, milling machine, grinder machine, welder machine, spark machine
- plastic industry machines: injection moulding machine, dryer, mixer, layer, toner, annealer, warm channel controller, conveyer-belt, selector, grinder, water cooler, ultrasound welder, tampon printing machine
- injection moulding tools: crate, basket, bucket, box, bowl, jar, cup, plate, tray, table-ware, toy, sporting equipments , flowerpot, tool box, DVD case, CD case
- general machines: compressor, electronic lever, forklift

Samples of few brands:

Battenfeld

Arburg

Demag

SWISS MADE

Netstal

Krauss Maffei

Engel
